## **Illinois Budget**

*Section Introduction: Next I'm going to ask you a few questions about the state of Illinois' budget.*

**13.** The state of Illinois has a budget deficit of over 6 billion dollars I'm going to read three statements that people have made about how to fix the deficit, and ask you which one comes closest to your views. If you haven't thought much about this issue, just tell me that. Illinois' public programs and services have already been reduced significantly we can only fix the problem by taking in more revenue, such as a tax increase (1); the state takes in plenty of money to pay for public services, but wastes it on unnecessary programs. We can fix the problem by cutting waste and inefficiency in government (2); OR the Illinois' budget problem is so large it can only be solved by a combination of budget cuts and revenue increases (3).
