

Cornell University

USAPNORC2016-0515

Country: United States
Title: Associated Press – NORC Center for Public Affairs
Research Poll: The Frustrated Public: Views of the
2016 Campaign, the Parties, and the Electoral
Process
Survey organization: The Associated Press-NORC Center for Public
Affairs Research
Sponsor: The Associated Press and NORC at the
University of Chicago
Field dates: May 12-15, 2016
Sample: National adult
Sample size: 1,060
Sample note: None
Interview method: Telephone and web
Weight location: Columns 9-16 (xxxxxxx) – Varname: FINALWT
No. of records per respondent: One
Usage notes: None

Please note that data provided by the Roper Center for Public
Opinion Research may not be disseminated without written
permission. The results of any analyses conducted on the data
may, however, be published with appropriate acknowledgments
and source citation.

Study Methodology

This survey was conducted by The Associated Press NORC Center for Public Affairs Research and with funding from NORC at the University of Chicago. Data were collected using AmeriSpeak Omnibus®, a monthly multi-client survey using NORC at the University of Chicago's probability based panel designed to be representative of the U.S. household population. The survey was part of a larger study that included questions about other topics not included in this report. During the initial recruitment phase of the panel, randomly selected U.S. households were sampled with a known, non-zero probability of selection from the NORC National Sample Frame and then contacted by U.S. mail, email, telephone, and field interviewers (face to face).

Interviews for this survey were conducted between May 12 and 15, 2016, with adults age 18 and over representing the 50 states and the District of Columbia. Panel members were randomly drawn from AmeriSpeak, and 1,060 completed the survey—761 via the web and 299 via telephone. The final stage completion rate is 29.6 percent, the weighted household panel response rate is 23.8 percent, and the weighted household panel retention rate is 90.5 percent, for a cumulative response rate of 6.4 percent. The overall margin of sampling error is +/- 4.1 percentage points at the 95 percent confidence level, including the design effect. The margin of sampling error may be higher for subgroups.

Once the sample has been selected and fielded, and all the study data have been collected and made final, a poststratification process is used to adjust for any survey nonresponse as well as any noncoverage or under and oversampling resulting from the study specific sample design. Poststratification variables included age, gender, census division, race/ethnicity, and household phone status. The weighted data, which reflect the U.S. population of adults age 18 and over, were used for all analyses.

About the Associated Press-NORC Center for Public Affairs Research

The AP-NORC Center for Public Affairs Research taps into the power of social science research and the highest quality journalism to bring key information to people across the nation and throughout the world.

- The Associated Press is the world's essential news organization, bringing fast, unbiased news to all media platforms and formats.
- NORC at the University of Chicago is one of the oldest and most respected, objective social science research institutions in the world.

The two organizations have established The AP-NORC Center to conduct, analyze, and distribute social science research in the public interest on newsworthy topics, and to use the power of journalism to tell the stories that research reveals.

The founding principles of The AP-NORC Center include a mandate to carefully preserve and protect the scientific integrity and objectivity of NORC and the journalistic independence of The Associated Press. All work conducted by The AP-NORC Center conforms to the highest levels of scientific integrity to prevent any real or perceived bias in the research. All of the work of The AP-NORC Center is subject to review by its advisory committee to help ensure it meets these standards. The AP-NORC Center publicizes the results of all studies and makes all datasets and study documentation available to scholars and the public.
